LEGO CLUBHOUSE BUILDING CHALLENGE WINNERS!

BIONICLE® BUILDER SHOWCASE!

Devastator

To hear this Dark Hunter tell it, he is one of the most powerful beings in existence after Mata Nui. The strength of five Toa courses through his frame, he can breathe fire, create earthquakes, turn his body into living lava, and even summon the dead – or so he says. How much of that is true is unknown.

"Devastator" is reported to have emerged from a fiery crag in the barren wastelands of an island not too far south of Metru Nui. According to Matoran legend, it is the domain of Karzahni, a powerful being whose realm is said to be the last stop for incompetent Matoran. Being a native of that realm, "Devastator" was quick to embrace the darkness and more than willing to use his powers to crush anything that caught his attention. He has a habit of turning simple hit-and-run missions into large scale chaos.

Powers: "Devastator" can transmute his body to sand, vanish into the ground, and then reappear and strike with rock-hard density. He apparently has strong telekinetic powers and will often rain boulders on a target with his mind before moving in to attack. The list of powers he claims to have is endless, but since there is no proof he has some of them, they are not being listed here.

Status: Very active. The Shadowed One recently dispatched him to a nearby island to collect a payment owed the Dark Hunters by the inhabitants. With luck, there will still be an island in existence when he's done.

MAKING MOSAICS!

Cynthia Bodin, LEGO Mosaic Designer

Have you made a LEGO® Mosaic? We recently spoke with Cynthia Bodin (Designer) and Lise Blume (Marketing Manager), two members of the Mosaic team here at The LEGO Company, for a BrickMaster-exclusive inside peek at the creation of this new line. Here's what they had to say!

LBM: WHAT IS A MOSAIC, AND WHAT IS A LEGO MOSAIC?

Cynthia: A mosaic is art or decoration made using small colored pieces to create a pattern or picture.

Lise: A LEGO Mosaic is a picture made with 1x1 LEGO bricks on a clear building plate. It lets you build detailed pictures that you can display by hanging them on your wall or putting them on a table, and you can show them to your friends and family. I think they are a nice way of expressing yourself, like a drawing or painting made in bricks.

"A mosaic is art or decoration made using small colored pieces to create a pattern or picture."

LBM: WHAT'S SPECIAL ABOUT LEGO MOSAIC?

Cynthia: The unique-ness of LEGO Mosaic is that you can make a flat image or a 3D one by building bricks on top of each other. And it's quite easy, since you can place the instructions under the clear base plate and start building, or make your own designs – there are endless possibilities!

Lise: They are quite simple to build, and the result looks fabulous, whether you use the instructions or make your own pictures.

LBM: HOW WAS LEGO MOSAIC CREATED?

Lise: It took a year to develop LEGO Mosaic. First we looked at the concept of mosaics: how should the building plates look, what parts work well, how we could make the instructions easy to use, etc.

Cynthia: We looked into ideas of what would be fun to build, from animals to landscapes and more. I built lots of mosaics and asked children and parents what they thought about them. Then we selected the final models, offering a variety of themes, colors and choice of 2D and 3D models.

"There is no right or wrong mosaic... It's all about expressing yourself and being creative!"

LBM: HOW DO YOU BUILD A LEGO MOSAIC?

Cynthia: You start by placing the transparent plate on top of the building instructions' grid for the design you've picked. Then you place the bricks on the plate and keep following the instructions until your Mosaic is done.

Lise: The designers here have different ways of creating new mosaics. One of them draws a sketch first, and another may just start to build and work out the details along the way.

LBM: WHAT CAN YOU DO WITH A LEGO MOSAIC WHEN YOU'RE DONE?

Lise: You can show it to somebody, hang it on your wall or your door, or put it on a table or shelf.

Cynthia: You can give it to your family, and when you feel like changing it, you can rebuild it into a new one!

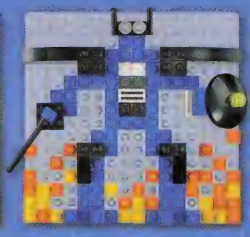
LBM: WHAT MAKES A GREAT LEGO MOSAIC?

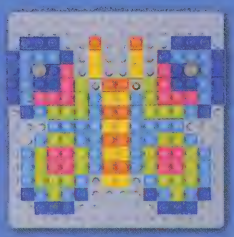
Cynthia: There is no right or wrong mosaic; either you choose to use the instructions for inspiration, or you can make one from your own imagination. It's all about expressing yourself and being creative!

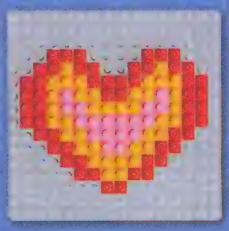
Lise: Any mosaic that you make can look great, whether it's a pattern that you like, a simple picture, or even a very detailed one.

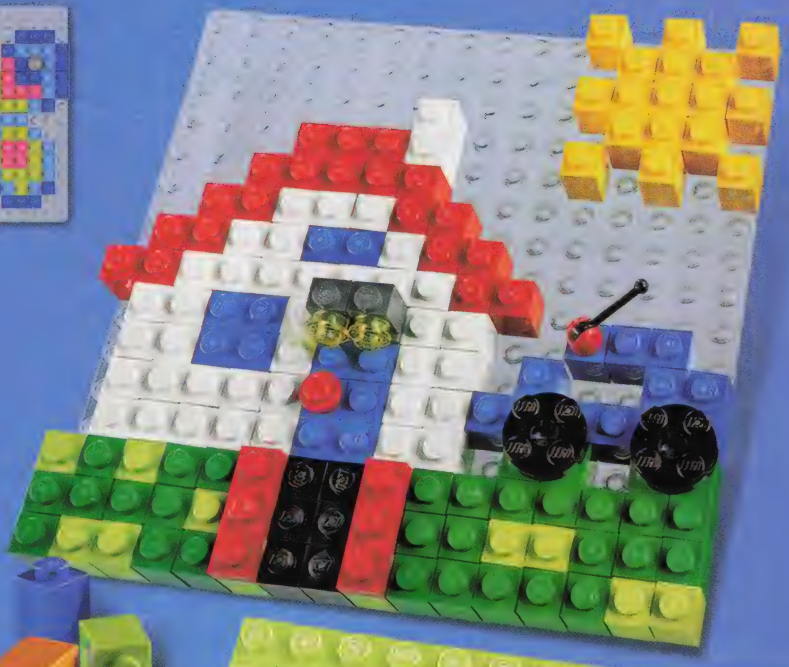
LBM: HOW CAN BUILDERS GET INSPIRATION FOR MORE LEGO MOSAICS?

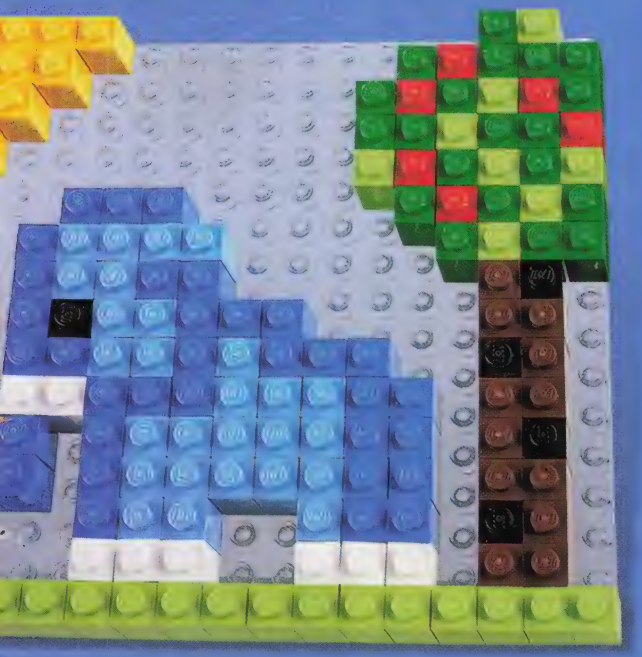
Lise: If you want more instructions, you can look at the Mosaic page at **www.LEGO.com**. If you want to create your own new

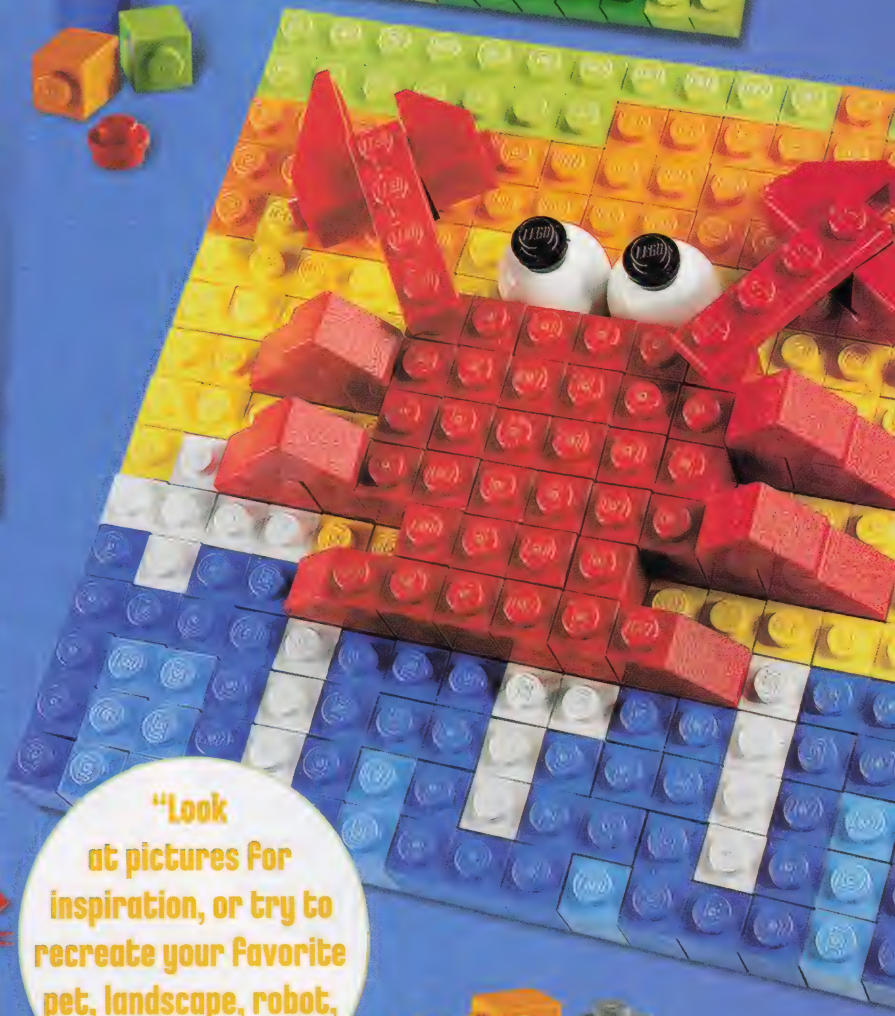








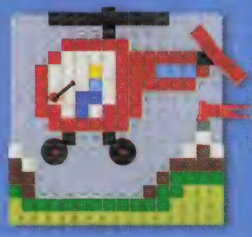




mosaics, look at pictures for inspiration, or try to recreate your favorite pet, landscape, robot, princess...

LBM: ANY LAST WORDS BEFORE WE GO?

Cynthia: I sat together with other LEGO designers and we made a huge mosaic by combining plates together. It was fun, and the result was great. Every time I want to give a present to someone, I make a mosaic. It's unique!



"Look at pictures for inspiration, or try to recreate your favorite pet, landscape, robot, princess..."

THANKS, LISE AND CYNTHIA!

Whether you're building alone or with friends and family, LEGO Mosaic is the way to go!
